Forex Deluxe Gainer

Expert Advisor

A Few Words

Congrats! You have made a right choice!

Forex Deluxe Gainer will take 1 mouse click to install. However you must have MetaTrader platform available, and if you don't have the platform yet, I will show you how in a few minutes.

A few things to take note when trade with Forex Deluxe Gainer:
- Please read the instruction carefully.
- Please leave the robot sometime to make trade and prove themselves.
- Turn off your robot during weekends or big new days.
- **Trade on demo account first to get familiar with the robot before trading on live accounts.**

I will try to make everything straightforward and simple, so you quickly go ahead to trade on demo account. In the next section I also introduce you the best setting for the robot.

Okay, let's dive in now!

To massive success,

INSTALLATION

To install the system you will need Metatrader 4 platform. Please register a free demo account with any broker supports this free software, like [FXDD](#). Download it and install it on your computer.

This software works the best on [FXDD](#) and [Interbank](#).

Step 1:

Run the Deluxegainer.exe which is auto installer. It will copy the .ex4 file (the robot) and the .dll file (library) into corresponding folders.

If you can't run the ex4 file, you can manually copy and paste the EA (ex4 file) to :

Windows/Program files/Metatrader/Experts

And the dll file to Windows/Program files/Metatrader/Experts/libraries

Step 2:

Restart Metatrader, and open any major pair chart.

This robot works best on EURUSD, any time frame 15M. You can run on other major pairs as well, but with less winning rate.

**Step 3**: Attach the robot to the chart

Step 4: Change Robot Settings as you wish.

We recommend you leave the settings as default.

The most important parameter you need to change is the GMTOffset parameter which is the difference in timing between your broker time and GMT time. You can ask your broker or search on the internet for this information.

In the popup window, change the settings of the EA or keep the defaults. Then click on "OK" button.

In the popup window, change the settings of the EA or keep the defaults. Then click on "OK" button.

Variable	Value
Key	Enter Your Clickbank Receipt Number Here
TakeProfit	10
StopLoss	39
Lots	1.0
MM	true
Risk	0.05
SignalMail	false
NFA	false
MaxDrowDown	false
MAxOrders	1
Slippage	3

Common | Inputs

[Load] [Save]

[OK] [Cancel] [Reset]

Now you should see a smiley face at the left side of the screen. That means your EA is installed correctly and working.

Any help or questions ?

Please contact me or the support team anytime.

Thank you and have a great trading day,

Mark Jenney

P.s: If you are looking for a Virtual Private Server (VPS) to run Forex Deluxe Gainer **(optional)**

You don't need to have a VPS to run this bot. [(Find out more about VPS here)](). However if you want to have your own web based server and run 24/7 at your command, you can consider this:

Virtual Private Server (VPS)
